Coton de Tulear Neonatal Cerebellar Ataxia Testing Request
For DNA samples already in the collection at the University of Missouri

**REQUESTING A DNA TEST** – To order a NCA test for a dog that has been sampled previously for research projects or DNA banking at the University of Missouri-Columbia, please follow these steps:

- **Complete the form on the following page.** You may have supplied some of this info when the sample was originally submitted, but we ask that you take this opportunity to update the current status of this dog. If you did not send a pedigree copy when the original sample was submitted, please include that information as well.

- **Choose how you want the results reported to you.** Please note that there is an additional charge for reports to be faxed or sent by surface mail.
  - Report sent via email ---------------------------- test fee = $35.00
  - (NOTE: No fee for samples from puppies who had symptoms of NCA)
  - Report sent via FAX or surface mail ----------- test fee = $45.00

- **Send** the form, and a check or money order for the appropriate amount of US funds, payable to “University of Missouri”, to this address;

  Dr. Gary Johnson – Coton NCA Testing
  320  Connaway Hall
  University of Missouri
  Columbia, MO 65211

Normal turnaround time is 2-3 weeks from the time requests arrive at our lab. We are not able to accommodate rush orders for this test. Please plan appropriately if testing potential breeding stock.

**PLEASE NOTE!** – This order form is ONLY to be used to request Neonatal Cerebellar Ataxia (NCA) test results for Cotons for which a DNA sample is **ALREADY IN THE COLLECTION at the University of Missouri-Columbia** as of May 1, 2010. Samples sent to other laboratories are not eligible. Blood samples sent for the CHIC DNA Bank ARE eligible, swab samples sent for the CHIC DNA Bank are NOT eligible. To test dogs not already sampled at UMC, there are 2 options:

1) Order the test and testing kit from OFA – Go to [www.OFFA.org](http://www.OFFA.org), scroll down below the announcements, and click on the DNA TESTING box to the far right. Follow the links there to order the NCA test. The kit you will be sent uses a cheek swab to collect DNA, and can be used for any dog.

2) Pups that have been diagnosed as affected with Neonatal Cerebellar Ataxia (Bandera’s syndrome) are eligible for a free DNA test if a blood sample, pedigree copy, and veterinarian’s report of symptoms observed is sent. Go to [www.CanineGeneticDiseases.net](http://www.CanineGeneticDiseases.net), click on ATAXIA, and then go to the SAMPLE SUBMISSION section for details and the correct form.

If you need clarification, or have any questions about any of these procedures, please contact Liz Hansen by email (HansenL@missouri.edu), or phone (573-884-3712).

Thank you for your cooperation and participation!
